Junior Engineer

About MainStreet Partners

We are the trusted ESG partner of top tier investors for a simple reason: we provide a one stop shop for their sustainability requirements at portfolio level. Our clients are some of the most sophisticated and leading Wealth Managers, Asset Managers, Investment Banks, Insurances and Asset Owners in the financial industry.

MainStreet is based in London, regulated by the Financial Conduct Authority and it consists of two main divisions:

- ESG Advisory – we have over 10 years of investment experience creating ESG multi-asset and multi-manager portfolios with mutual funds, stocks and bonds. We develop products with our partners which target United Nations Sustainable Development Goals or thematic investments;
- Portfolio Analytics – we provide a holistic approach to ESG data analysis such as: transparent and detailed Fund ESG Ratings, assessment of clients' portfolios to enhance their ESG profile and align them with the "green" regulation.

Our solutions are delivered through proprietary models and databases available on a unique and user-friendly ESG platform. Our clients can create sustainable model portfolios and / or analyse their portfolios thanks to:

- ESG ratings of issuers (equities, corporate and government bonds, green, sustainability and social bonds);
- ESG ratings of funds with the addition of extra-financial disclosures and SDGs alignment;
- Exclusion lists and analysis of controversial activities and behaviours;
- Advanced models to create universes and portfolios targeting specific SDGs and extra-financial results.

Further information about MSP is available at www.mspartners.org

MainStreet Partners have experienced rapid growth over the past 12 months, doubling their headcount in the same time span. We plan to continue expanding to achieve our ambitious target to become the key player within the European industry.

At MainStreet Partners, we have been investing significantly in entry level talents, as we firmly believe that corporate development starts from individuals' professional growth. Employees growing within the firm further strengthen our corporate culture and will play a key role in shaping our future strategic and tactical direction business.

We are seeking a highly motivated professional sharing MainStreet Partners' vision and values with a demonstrated interest in supporting the growth of our company.

WHAT TO EXPECT

As Junior Engineer you will be part of a team focused on automating core internal processes. The challenges are varied; from integrating with 3rd party data providers, streamlining the way internal models are run to automating reporting processes (Excel, PowerPoint).

The company is growing fast but is still small, you will have a chance to make an impact by working closely with the CTO, Business Analyst, Research Analysts and Directors.

Tech is Python and (a little bit of) VBA, we aim to phase out the latter and introduce c#.

We will make sure you are set up for success when it comes to your career aspirations; give you opportunities to grow through overcoming **good** challenges.

Key role requirements:

- Positive attitude – you are not afraid to pick up new development languages or use new tools
- Good communication skills – you ask for help when you cannot overcome a problem
- Ability to work as part of a team
- Prior experience with software development languages.
Knowledge of Python, c# and SQL preferred but not essential
- Appreciation for automated testing, you do not have to be an expert, but you should understand general principles behind it
- Attention to detail and desire to continuously improve
- Good organisational and time management skills.
